PROJECT

Wanderlust: Designed and built a scalable RESTful web application that serves over 50+ listings.

- **Stack:** Node.js, Express.js, MongoDB, HTML, CSS & Bootstrap. [Code](#)
- **System Organization of RESTful Routes** – Managed nested routing logic and created, read, updated, and deleted operations for user-generated content.
- **Interfacing with MongoDB Data** – The retrieval, updating, and deletion of data is much more complicated when trying to avoid performance issues and slowdowns associated with data indexing, queries, and other system checks.

WorldAtlas: Built a dynamic based platform with real-time country data for 120+ nations.

- **Stack:** React.js, JavaScript, HTML and CSS. [Code](#)
- **Country Info Cards:** Showcase active content with flags, capitals, currencies, fun facts, and significant trivia.
- **Country Search & Filter:** Provide the ability for users to search for a country, or filter by continent, or sorting by population.

Portfolio Website: A personal page that shows my skills, project demos, and contact information . [Code](#)

- Created smooth navigation, animations, and a clear content layout using modern HTML, CSS, and JavaScript. It serves as a professional web presence and an alternative to a resume.
